

Twistcode is an IT company that was founded in 2006. Specialised in HPC technology that are tested and validated by SIRIM Berhad, Twistcode is the first and currently the only certified and verified HPC company in Malaysia. Twistcode built and assembled their own GPU-based supercomputer to accelerate genomic data processing, rendering, deep learning, artificial intelligence ranging from finance, scientific and engineering simulations, all in one-platform.

Twistcode created and enable new ideas and technologies that revolves around Artificial Intelligence and Supercomputing. Aiming to fill the gap between solution providers and end users where most end users could not code and solution providers only offer hardware and not algorithm or software optimization, Twistcode offers convergence between the two parties in their own website “mata.my”.

Malaysia Technology Development Corporation (MTDC) has awarded Twistcode® as the recipient of Business Start-up Fund (BSF) with the objective of being the leader of high-performance computing industry in Malaysia. Twistcode have been selected by the Committee Members of Malaysia Venture Capital and Private Equities Association (MVCA) as the “best Outstanding Investee Companies 2018”.

“We twist codes for life. And we have our own supercomputers”
